THE REALITY STORE

Hi my name is Shawn [REDACTED]. I am writing this for my 8th grade Home & Careers class. This is about budgeting, writing checks, and making sure I have enough money for the items I purchase. The Reality Store is broken up into different sections. One is luxury, pets, transportation, and the IRS. In each one of the sections there is a box with the name on it. In each one of the boxes you put the checks of the correct price and item you want to buy, but first you have to budget by this I mean to see if you have enough money left. This essay discusses lessons I learned from this exercise.

My budgeting did not turn out the way I expected. I only have 67\$ left a month. Some of the reasons it did this are because of the things I bought, such as a Chevy S/10 pickup and a Ford Mustang convertible. I think if I was to think of other things such as soap or gas for my 11 car and I would have thought less about the more expensive cars. No I wouldn't change what I did at the Reality Store because I was broke with only 67\$ left I couldn't buy anything at the store, but if I were to budget properly I would have. I would buy shoes for the family, a pet, toys for the kid, and games for all of us. That would have changed my results because of the money I saved and supported my family with. I learned that you should budget your money correctly so you can buy necessities for your kids and wife. I will use this knowledge for keeping clothes on my families back, and providing a roof over their heads.

From this I learned many things. The first thing I learned is to budget my things correctly. I also learned to keep track of my money. I learned to be more practical too, not spending money on things I don't need.
